Recommended title for 2005 ACSM Certification Examinations! ACSM's Guidelines for Exercise Testing and Prescription began as a concise summary of recommendations for exercise testing and prescription primarily for cardiac patients; it has now become one of the single most internationally read and referenced texts of its kind. This reference is a virtual pharmacopoeia of exercise guidelines in a broad spectrum of patients. In this new edition there is heightened emphasis on preventing illness in apparently healthy persons and those "at risk", as well as treating patients with chronic disease. There are also two new chapters on methods for changing exercise behavior and legal issues.

Developed by ACSM, this text presents a framework for optimizing patients' and clients' functionality by keeping them physically active. It provides evidence-

informed guidance on devising individualized exercise programs for persons with chronic and comorbid conditions.

The single most internationally read and referenced text in sports medicine, exercise science, and health and fitness, this manual succinctly summarizes recommended procedures for exercise testing and exercise prescription in healthy and diseased individuals. This gold-standard text is a convenient, one-stop resource for the knowledge, skills, and abilities (KSAs) that must be mastered by candidates for all ACSM certifications. Written by international experts in numerous fields, the Eighth Edition is fully compatible with newly released physical activity guidelines from the United States Department of Health and Human Services and state-of-the-art, research-based recommendations. A companion Website for instructors will offer a test generator, an image bank, PowerPoint slides, and a WebCT/BlackBoard-ready course cartridge. A student Website will offer the fully searchable text.
