Qualified personnel must complete all work. Do not apply power to the Type II Vipros 358 King until an A.E.S.I. (Amada Engineering and Service Incorporated) Engineer is present and has instructed you to do so. Considerable effort has been made to ensure that this manual is free of inaccuracies and omissions.

The Vipro 358 King requires two electrical power sources. The first power source is supplied to the Fanuc O4PC control. The Fanuc O4PC control should be supplied from a power line separate from those used for welding machines or other machines that produce electrical noise. The second source is connected to the SBC-5.5 chiller.

~~Vipro 358 King User Pre installation Guide — Used AMADA~~

The AMADA VIPROS KING Series, with its rates up to 1200 SPM, ensures that the optimum ram cycle is used for forming, piercing, nibbling, slitting and marking. Its "closed portal" structure gives rigidity to the structure, increasing the life of the machine and equipment.
