July 13, 2021 - iBooks, the New-York-based publisher of *The Secret: A Treasure Hunt* and the first Hugo Award winner *The Demolished Man*, confirmed today that the previously announced publication of a ...

In *Art: A New History*, Paul Johnson turns his great gifts as a world historian to a subject that has enthralled him all his life: the history of art. This narrative account, from the earliest cave paintings up to the present day, has new things to say about almost every period of art. Taking account of changing scholarship and shifting opinions, he draws our attention to a number of neglected artists and styles, especially in Scandinavia, Germany, Russia and the Americas. Paul Johnson puts the creative originality of the individual at the heart of his story. He pays particular attention to key periods: the emergence of the artistic personality in the Renaissance, the new realism of the early seventeenth century, the discovery of landscape painting as a separate art form, and the rise of ideological art. He notes the division of 'fashion art' and fine art at the beginning of the twentieth century, and how it has now widened. Though challenging and controversial, Paul Johnson is not primarily a revisionist. He is a passionate lover of beauty who finds creativity in many places. With 300 colour illustrations, this book is vivid, evocative and immensely readable, whether the author is describing the beauty of Egyptian low-relief carving or the medieval cathedrals of Europe, the watercolours of Thomas Girtin or the utility of Roman bridges ('the best bridges in history'), the genius of Andrew Wyeth or the tranquility of the Great Mosque at Damascus, the paintings of Ilya Repin or a carpet-page from the Lindisfarne Gospels. The warmth and enthusiasm of Paul Johnson's descriptions will send readers hurrying off to see these wonders for themselves.

An exemplary survey that reassesses the impact of the most important books to have shaped art history through the twentieth century. Written by some of today's leading art historians and curators, this new collection provides an invaluable road map of the field by comparing and reexamining canonical works of art history. From Émile Mâle's magisterial study of thirteenth-century French art, first published in 1898, to Hans Belting's provocative *Likeness and Presence: A History of the Image before the Era of Art*, the book provides a concise and insightful overview of the history of art, told through its most enduring literature. Each of the essays looks at the impact of a single major book of art history, mapping the intellectual development of the writer under review, setting out the premises and argument of the book, considering its position within the broader field of art history, and analyzing its significance in the context of both its initial reception and its afterlife. An introduction by John-Paul Stonard explores how art history has been forged by outstanding contributions to scholarship, and by the dialogues and ruptures between them.

02 In this fourth volume of the *Art of the Twentieth Century* series, the contributors address a fascinating variety of themes relating to art from the 1960s to the end of the century—the period of “postmodernism.” The first of the book's seven chapters deals with the emergence in the 1960s of what has been called an “expanded field” for art activity. Other chapters discuss the consequences of Conceptual art for notions of the aesthetic; the Post-Conceptual practice of painting; practices of Post-Conceptual photography; video, performance, and installation art; and women's practice and the question of gendered and nongendered objects. The final chapter explores the globalization of art at the end of the twentieth century. Full color illustrations are featured throughout the volume. Gill Perry is senior lecturer in art history, The Open University. Paul Wood is senior lecturer in art history, The Open University. Paul Brown is the definitive book on an artist who is widely regarded as the preeminent American illustrator of equestrian subjects. Based on extensive interviews with Brown's family, friends, and artistic contemporaries, Paul Brown includes a biography of the man and contains a complete listing of all the published works that include Brown's art as well as listings of all of Brown's prints, items sometimes attributed to Brown, and methods of identifying first editions of Paul Brown's art. Although Brown is primarily known for his wonderful paintings, drawings and sketches of horses and equestrian sports, he is also well known for his elegant and prolific illustrations for Brooks Brothers catalogs over three decades.

David Hockney is as fascinating as he is articulate on ways of seeing, and in this impressive book he leads us on an artistic journey where anything is possible. He considers the influence of Picasso and Rembrandt and speaks of Eastern conventions and perspective and of their relevance to his work. He points to Laurel and Hardy's lasting appeal in his conviction that popularity and art are not incompatible. Hockney and his work have long been the subjects of controversy; few twentieth century artists have so successfully surmounted their cult image for three decades, and he remains one of our most relentlessly dedicated, versatile and original painters. Beautifully illustrated, HOCKNEY ON ART is a rare insight into the thought-processes and working life of our most celebrated artist.

Since the confirmation of Deng Xiaoping ’ s policy of Opening and Reform in 1978, the People ’ s Republic of China has undergone a liberalization of culture that has led to the production of numerous forms of avant-garde, experimental, and museum-based art. With a fast-growing international market and a thriving artistic community, contemporary Chinese art is riding a wave of prosperity, though issues of censorship still abound. Shedding light on the current art scene, Paul Gladston ’ s Contemporary Chinese Art puts China ’ s recent artistic output into the context of the wider cultural, economic, and political conditions that surround it. Providing a critical mapping of ideas and practices that have shaped the development of Chinese art, Gladston shows how these combine to bind it to the structure of power and state both within and outside of China. Focusing principally on art produced by artists from mainland China—including painting, film, video, photography, and performance—he also discusses art created in Taiwan, Hong Kong, Macau, and diasporic communities. Illustrated with 150 images, Contemporary Chinese Art unravels the complexities of politics, artistic practice, and culture in play in China ’ s art scene.

"The creation of the United States of America is the greatest of all human adventures," begins Paul Johnson. "No other national story holds such tremendous lessons, for the American people themselves and for the rest of mankind." In his prize-winning classic, Johnson presents an in-depth portrait of American history from the first colonial settlements to the Clinton administration. This is the story of the men and women who shaped and led the nation and the ordinary people who collectively created its unique character. Littered with letters, diaries, and recorded conversations, it details the origins of their struggles for independence and nationhood, their heroic efforts and sacrifices to deal with the 'organic sin ’ of slavery and the preservation of the Union to its explosive economic growth and emergence as a world power. Johnson discusses contemporary topics such as the politics of racism, education, the power of the press, political correctness, the growth of litigation, and the influence of women throughout history. He sees Americans as a problem-solving people and the story of their country as "essentially one of difficulties being overcome by intelligence and skill, by faith and strength of purpose, by courage and persistence... Looking back on its past, and forward to its future, the auguries are that it will not disappoint humanity." Sometimes controversial and

always provocative, A HISTORY OF THE AMERICAN PEOPLE is one author ' s challenging and unique interpretation of American history. Johnson ' s views of individuals, events, themes, and issues are original, critical, and in the end admiring, for he is, above all, a strong believer in the history and the destiny of the American people.

Art in Theory 1648-1815 provides a wide-ranging and comprehensive collection of documents on the theory of art from the founding of the French Academy until the end of the Napoleonic Wars.
