Preceded by Basic geriatric nursing / Gloria Hoffmann Wold. 5th ed. c2012.

The bestselling LPN/LVN geriatric nursing textbook, Basic Geriatric Nursing, 5th Edition covers age-appropriate nursing interventions in a variety of health care settings. It includes the theories and concepts of aging, covers expected physiologic and psychosocial changes, and highlights delegation, coordinated care, end-of-life care, patient teaching, quality of life, safety, and home care. This edition is updated with the latest issues and trends in geriatric nursing, including changes to the health care system and demographics. Part of the popular LPN Threads series, Gloria Hoffman Wold's text provides a clear and compassionate introduction to geriatric care. Complete coverage of key topics includes baby boomers and the impact of their aging on the health care system, therapeutic communication, cultural considerations, spiritual influences, evidence-based practice in geriatric nursing, and elder abuse, restraints, and ethical and legal issues in end-of-life care. UNIQUE! Delegation, leadership, and management content is integrated throughout. Nursing Process sections provide a framework for the discussion of the nursing care of the elderly patient as related to specific disorders. UNIQUE! A FREE Study Guide in the back of the book reinforces understanding with scenario-based clinical activities and practice questions. UNIQUE! Nursing interventions are numbered and grouped according to health care setting (e.g., acute care, extended care, home care), in a patient-centered approach emphasizing the unique needs of the older adult. UNIQUE! Nursing Care Plans with critical thinking questions help in understanding how a care plan is developed, how to evaluate care of a patient, and how to apply your knowledge to clinical scenarios. UNIQUE! Critical Thinking boxes help you to assimilate and synthesize information. Clinical Situation boxes present patient scenarios with lessons for appropriate nursing care and patient sensitivity. Coordinated Care boxes address such topics as restraints, elder abuse, and end-of-life care as related to responsibilities of nursing assistants and other health care workers who are supervised by LPN/LVNs. UNIQUE! Complementary and Alternative Therapies boxes address specific therapies commonly used by the geriatric population for health promotion and pain relief. Cultural Considerations boxes encourage culturally sensitive care of older adults. UNIQUE! Patient Teaching boxes highlight health promotion, disease prevention, and age-specific interventions. UNIQUE! LPN Threads make learning easier, featuring an appropriate reading level, key terms with phonetic pronunciations and text page references, chapter objectives, special features boxes, and full-color art, photographs, and design.

This textbook presents hands-on training material for medical students. The style reflects the need for practice-based teaching with a modern edge in daily clinical routine; accordingly, it also employs online material and pocket cards. Each chapter begins with specific learning objectives, which are cross-referenced with the European curriculum for undergraduate medical education released by the European Union of Medical Specialists (UEMS) together with the European Union Geriatric Medicine Society (EUGMS), as well as the minimum geriatric competences for medical students established by the American Geriatrics Society (AGS). World-renowned European experts in practicing and teaching the interdisciplinary field of Geriatrics contributed to this work, with the aim of offering the new generation of health professionals a global perspective on one of the greatest public health challenges of our time: the management of the steadily increasing number of older, multimorbid, and vulnerable persons. The major strength of this book - published under the auspices of the EUGMS - is its pragmatic, goal-oriented approach, which makes it suitable for bedside learning and patient-centered medicine; further, all of the chapters are firmly based on the pillars of the ageing process in all of its biological aspects, helping readers understand the pathophysiology of and rationale behind interventions for the main geriatric syndromes and disorders.

Nurse practitioners have long required a comprehensive certification review book for the ANCC Gerontological Nurse Practitioner (GNP) exam. This is the first book on the market to provide a thorough review of test content to effectively prepare nurses to successfully pass the GNP certification exam. With almost 200 practice questions culled from the real ANCC test outline, this is the only book nurse practitioners need to pass the ANCC exam. Key features: Includes guidelines on question dissection and analysis Discusses health promotion and disease prevention Covers assessment of acute and chronic illness Provides information on clinical management and pharmacological/non-pharmacological interventions Describes the nurse practitioner and patient relationship Discusses professional role and policy issues

The Gerontological Nurse Certification Review is an invaluable reference and certification test review guide for nurses preparing for RN Gerontological certification. Students studying gerontology, teachers preparing gerontology classes, and RNs working with older adults will also find this a practical and useful resource. The text presents information about preparing for the certification exam, a comprehensive compilation of content specific to gerontology, and a test bank of questions specifically developed for the RN. Why this is the only test review you need: Developed to address all aspects of ANCC exam Formatted for easy review and understanding of concepts Up-to-date and evidence-based 500 review questions to adequately prepare future gerontological nurses One of a kind--no other gerontological review books are currently available

Study Guide to Geriatric Psychiatry is a question-and-answer companion that allows you to evaluate your mastery of the subject matter as you progress through The American Psychiatric Publishing Textbook of Geriatric Psychiatry, Fifth Edition. The Study Guide is made up of approximately 255 questions divided into 25 individual quizzes of 8--17 questions each that correspond to chapters in the textbook. Questions are followed by an answer guide that references relevant text (including the page numbers) in the textbook to allow quick access to needed information. Each answer is accompanied by a discussion that not only addresses the correct response but also explains why other responses are not correct. The Study Guide's companion, The American Psychiatric Publishing Textbook of Geriatric Psychiatry, Fifth Edition, has been thoroughly reorganized and updated to reflect new findings, with expanded treatment options and considerations and future directions, such as translational research, enhancing the text's utility while maintaining its reputation as the foremost reference and clinical guide on the subject.
