Learn how to better understand and apply research to your everyday practice with LoBiondo-Wood and Haber ' s Nursing Research in Canada: Methods, Critical Appraisal, and Utilization, 5th Edition. Written by an all-star team of educators and research experts from Canada and the US, this thoroughly updated text is the perfect resource to help ground you in the processes behind nursing research and evidence-informed practice. This edition features new research examples that reflect the most current Canadian studies, fresh vignettes, easy-to-use navigation tools, enhanced readability, and well-balanced coverage of both qualitative and quantitative research methods. Balanced-but-distinct coverage of both the qualitative and quantitative approaches to nursing research acquaints you with the processes behind research and evidence-informed practice. Complete, high-quality research examples, including four new sample critiques, demonstrate how to apply the judgement and reasoning principles outlined in the text to published quantitative and qualitative research studies. Research Vignettes introduce you to real-world practitioners of nursing research and help bridge the gaps among clinical research, academia, and clinical practice. Vignettes cover timely topics facing Canadian nurses such as immunization, Medical Assistance in Dying (MAiD), medical cannabis, public health, Indigenous health and nursing, and rural and remote nursing. Effective learning aids in every chapter include Key Terms, Learning Outcomes, Research Hints, Evidence-Informed Practice Tips, Appraising the Evidence, Critiquing Criteria, Critique of a Research Study, Critical Thinking Decision Paths, Critical Thinking Challenges, Critical Judgement Questions, and Key Points. NEW! Part 2: Indigenous Peoples: Research, Knowledges, and Ways of Knowing introduces you to the history and significance of colonization as it relates to how Indigenous peoples have been affected by, and are affecting, nursing and health research. NEW! Inclusion of Indigenous Research Methods and application to the findings of the Truth and Reconciliation Committee. NEW! All-new research examples and vignettes demonstrate the most current, high-quality published studies to exemplify the work of prominent nurse-researchers and to encourage the development of clinical reasoning and judgement. NEW! Critical judgement-focused practice questions in the printed text, accompanying study guide, and companion Evolve website promote critical thinking and prepare you for exam licensure. NEW! Glossary of key terms at the end of the book gives you quick access to all new key terms.

The 4th edition of this extensive text is an outstanding resource prepared by nurses (and a librarian) for nurses. In a structured and helpful style it presents thousands of items from the literature - published papers, reports, books and electronic resources - as a clear, accessible, and most of all useful collection. The efforts to signpost and lead the reader to the sought-for information are effective and well-conceived, and the 'How to use this book' section is remarkably simple...the book should be found in every nursing and health library, every research institute and centre, and close to many career researchers' desks" - RCN Research This latest edition of Resources for Nursing Research provides a comprehensive bibliography of sources on nursing research, and includes references for books, journal papers and Internet resources. Designed to act as a 'signpost' to available literature in the area, this Fourth Edition covers the disciplines of nursing, health care and the social sciences. Entries are concise, informative and accessible, and are arranged under three main sections: - 'Sources of Literature' covers the process of literature searching, including using libraries and other tools for accessing literature - 'Methods of Inquiry' includes an introduction to research, how to conceptualize and design nursing and health research, measurement and data collection, and the interpretation and presentation of data - 'The Background to Research in Nursing' encompasses the development of nursing research; the profession's responsibilities; the role of government; funding; research roles and careers; and education for research. Fully revised and updated, the Fourth Edition includes just under 3000 entries, of which 90% are new. It has extensive coverage of US, UK literature and other international resources. This new edition will be an essential guide for all those with an interest in nursing research, including students, teachers, librarians, practitioners and researchers.
