Typische Vertreter sind die salzartigen Verbindungen der anorganischen Chemie, vor allem die Alkalihalogenide ... Clustern und Festkörpern geht heute durchweg von quantenmechanischen Modellen aus.

In the course of the tremendous political and economic upheaval starting in 1989/1990 many industrial cities and regions in Central and Eastern Europe have been confronted with profound problems. This book presents eleven detailed national reports which describe the situation in such cities and regions as well as the strategies which have been employed to cope with structural change. The country reports are complemented by short case studies of selected cities and regions. An introduction gives background to such topics as structural change and the ramifications of EU enlargement. Finally some conclusions are drawn and recommendations offered for future policy.

NeuroKinetic Therapy is based on the premise that when an injury has occurred, certain muscles shut down or become inhibited, forcing other muscles to become overworked. This compensation pattern can create pain or tightness. By applying light pressure that the client then resists, the practitioner can evaluate the strength or weakness of each muscle, revealing the sources of injury and retraining the client's body to remove the compensation patternsreprogramming the body at the neural level.This easy-to-follow practitioner's manual presents a series of muscle tests specially designed to uncover and resolve compensation patterns in the body. Author David Weinstock begins by explaining how this approach stimulates the body and mind to resolve pain. Organized anatomically, each section of the book includes clear photographs demonstrating correct positioning of the muscle accompanied by concise explanations and instructions. Labeled anatomical illustrations appear at the end of each section showing the relationships between the muscles and muscle groups. This essential resource is especially useful for physical therapists, chiropractors, orthopedists, and massage therapists looking for new ways to treat underlying causes of pain.

From the same author as the popular first edition, the second edition of this trusted, accessible textbook is now accessible online, anytime, anywhere on Kerboodle. It breaks down content into manageable chunks to help students with the transition from GCSE to A Level study, and has been fully revised and updated for the new A Level specifications for first teaching September 2015. This online textbook provides plenty of examples and practice questions for consolidation of learning, with 'Biology at Work', 'Key Skills in Biology' and 'Study Skills' sections giving many applications of biology throughout. Suitable for AQA, OCR, WJEC and Edexcel.

After recounting her experience as a Jewish girl living in Amsterdam during the Holocaust, Esther, helped by her grandson, embarks on a search to discover what happened to her parents before they died in a concentration camp.
