Earth Science Geology, the Environment, and the Universe
Geology is the primary Earth science. The word means "study of the Earth." Geology deals with the composition of Earth materials, Earth structures, and Earth processes. It is also concerned with the organisms of the planet and how the planet has changed over time. Geologists search for fuels and minerals, study natural hazards, and work to protect Earth's environment.

What is Earth Science? | Geology.com
Environmental Earth Sciences is an international multidisciplinary journal concerned with innovative approaches and significant aspects of interaction between humans, natural resources or unique geographic zones, with emphasis on the solid earth. In pursuit of these topics, the geoscientific community is invited to contribute their knowledge and experience.

Earth Science Geology, the Environment, and the Universe ...
Environmental Science provides an overview of how science affects our environment. We focus on interactions between the solid Earth, its water, its air and its living organisms, and on dynamic, interdependent relationships between these four components. Earth and environmental scientists also consider how these relationships produce environmental change at different timescales.

Earth Science Geology, The Environment and Universe ...
Geology is the study of materials that make up the Earth, the processes that form and change these materials, and the history of the planet and its life-forms since its origin. Oceanography is the study of oceans, which cover nearly three-fourths of the planet. Environmental science is the study of the interactions of organisms and their surroundings.

Mr. Smith's Earth & Environmental Science Class - Home
Department of Earth and Environmental Sciences The Earth and Environmental Sciences Department has five major curricular areas: geology, astronomy, meteorology, environmental science, and earth science education. Degrees are available in Environmental Science, Earth Science, and Earth Science Teaching.
