similar trade and hobby tasks. Most are hand tools, made of a case hardened steel bar of rectangular, square, triangular, or round cross-section, with one or more surfaces cut with sharp, generally parallel teeth. A narrow, pointed tang is common at one end, to which a ...

File (tool) - Wikipedia

Filing is a material removal process in manufacturing. Similar, depending on use, to both sawing and grinding in effect, it is functionally versatile, but used mostly for finishing operations, namely in deburring operations. Filing operations can be used on a wide range of materials as a finishing operation. Filing helps achieve workpiece function by removing some excess material and deburring the surface. Sandpaper may be used as a filing tool for other materials, such as wood.

Filing (metalworking) - Wikipedia

Bachelor's Degree in a Science, Technology, Engineering or Mathematics discipline from an accredited university and 2 years of manufacturing/process engineering OR Master's Degree in STEM and 0 years of manufacturing/process engineering experience Bachelor's degree in an aerospace, manufacturing or mechanical engineering.
