Unconscious Creativity, Conscious
Creating Harper Perennial

By demonstrating that unconscious processes can be important for creativity, the current findings may encourage practitioners to use unconscious processes in order to enhance creative thinking. Applying unconscious processes could, for example, entail that people set a goal to find creative solutions for a problem before they are distracted from the problem by doing something different.

Jung attributed to the unconscious a creative function, in that it presents to consciousness contents necessary for psychological health. It is not, however, superior to consciousness; its messages (in dreams, impulses, etc.) must always be mediated by the ego. The unconscious is useless without the human mind.

As Alice Reyner's paper on Stanislavski and Bradley in NTQ 4 illustrated, Stanislavski remained very much a man of his own time, however enduring his approach to acting has proved. Here, Natalie Crohn Schmitt examines one of the concepts most crucial to 'the system' – a concept which is in its essentials, however, derived from nineteenth-century ideas, now being challenged, about the relationship between creativity and the unconscious.
