Throughout their history, the Romans were troubled by formidable warlike tribes along their northern borders. The Celts of Gaul and Northern Italy, who sacked Rome itself, the British who repulsed Julius Caesar and resisted later occupation, the Germanic tribes along the Rhine and the fearsome falx-wielding Dacians on the Danube, all proved worthy foes of the legions. If you are raising your own army to defy the might of Rome, Andy Singleton will help you get them ready for battle with ease. The emphasis is on achievable results and practical advice to get your army painted and ready for gaming in a reasonable time frame, and achieve a fine collection that will look great on the shelf or table. Most of the figures featured in the numerous illustrations are 28mm but the techniques described are easily adaptable to smaller scales and to plastic or metal. Step-by-step guidance takes the process from initial preparation and assembly of the figure, to finishing and basing. Themed chapters cover armour, clothing, skin tones, warpaint and tattoos, shields and horses.

While it may seem easy to paint a three dimensional miniature figure,

to do it properly requires a practiced hand and some artistic techniques. Because the figure is so small the shadings and highlights must be emphasized to make the figure seem realistic. Mike Davidson has years of experience painting miniature military figures and in teaching the art to others. Using a combination of hobby paints and oils he is able to create a visual effect that brings life to the cast or sculpted figures. In this book Mike takes a commercially produced casting and takes the reader through the process of assembly, painting and mounting, ending with a figure that would be a proud addition to any collection. Each step is clearly photographed and captioned so that the reader may follow them. While applied to a particular figure, the lessons learned from this book will enhance any painting the reader may choose to do.
