Intermediate Accounting, 3e, by Spiceland/Sepe/Tomassini will gain support in traditional and technology-driven accounting departments, especially those looking for a more concise, decision-making text that reinforces challenging concepts via CD-ROM. The revision of this text is based around a "Learning System." The revision of this "Learning System" was built on improving the clarity of the chapters, emphasizing more decision-making in order to prepare students for the changes taking place on the CPA exam, acknowledging the diversity of students and their learning styles by creating supplemental materials to assure the success of every student, and creating a consistent text and supplemental package for both students and instructor's giving us the best possible intermediate text on the market. Returning to the Third edition is the award winning "Coach" CD-ROM. The Coach CD-ROM is a multimedia product integrating audio and video clips, animated illustrations, cases, and alternative reading material that helps students comprehend some of the more difficult topics associated with intermediate accounting. Designed specifically for the Spiceland text, instructors and students will find these learning tools placed strategically throughout the text. This is the most comprehensive Learning System in Intermediate Accounting. At only 1120 pages (300 pages less than the average intermediate accounting text), Spiceland/S/T has not sacrificed content for pages. Instead, the authors have created a very flexible text with a student friendly writing style that focuses on explaining not just how to apply a procedure, but why it's applied.

Principles of Animal Behavior has long been considered the most current and engaging introduction to animal behavior. The Third Edition is now also the most comprehensive and balanced in its approach to the theoretical framework behind how biologists study behavior.

This introductory text emphasises physical principles, rather than the mathematics. Each topic begins with a discussion of the physical characteristics of the motion or system. The mathematics is kept as clear as possible, and includes elegant mathematical descriptions where possible. Designed to provide a logical development of the subject, the book is divided into two sections, vibrations followed by waves. A particular feature is the inclusion of many examples, frequently drawn from everyday life, along with more cutting-edge ones. Each chapter includes problems ranging in difficulty from simple to challenging and includes hints for solving problems. Numerous worked examples included throughout the book.

Written in an accessible style, this text assumes that the student has no previous education in taxation. Byrd & Chen's Canadian Tax Principles, 2010-2011 Edition, can be used with or without other source materials (this includes the Income Tax Act, Information Circulars, Interpretation Bulletins, and other official materials). The Income Tax Act is referenced in the text where appropriate for further independent study. Students should be able to solve all of the end-of-chapter problems by relying solely on the text as a reference. The text and problem materials are comprehensive of the syllabus requirements of the CGAs, CAs, and CMAs. For your convenience, the text material is now presented in two separate volumes.

M: Management by Bateman/Snell is the fastest growing Principles of Management textbook on the market. Bateman/Snell is written from the ground up to be brief, lean, and flexible enough to enable you to cover just the topics you want at the level of depth you want, while still maintaining the integrity of the content. Plus, it does not inherit outdated examples from a hardback derivative. With market-leading teaching support and the most up to date content available, M: Management represents the best value available in the brief Principles of Management market. What sets Bateman/Snell apart? An unrivaled mixture student-focused current content and the best teaching support around.

Essentials of Business Statistics: Communicating with Numbers is a core statistics textbook that sparks student interest and bridges the gap between how statistics is taught and how practitioners think about and apply statistical methods. Throughout the text, the emphasis is on communicating with numbers rather than on number crunching. By incorporating the perspective of professional users, the subject matter is more relevant and the presentation of material more straightforward for students. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

Miller's name appears first on the ealier editions.
