A guide for men whose wives contract breast cancer offers emotional support and advice every husband needs, including guidance from breast cancer doctors and the shared experiences of those who have gone through the same ordeal. Original. 30,000 first printing.

Cancer changes everything. Just a few months after a fairy-tale wedding and dream honeymoon, Luke and Michelle find out news that shatters their hopes and dreams for their once bright future. Luke has cancer. Michelle struggles with how to adjust to this new reality in addition to being a new wife. Luke's road ahead is a difficult path. In this inspiring true story this young couple endures pain and hardships while their faith is strengthened and renewed. This true story explores what it is like to live first hand with this devastating disease. They are up against trial after trial. They learn that through faith in God, nothing can crush them, not even cancer. Excerpt from Chapter 1- I couldn't breathe. I couldn't speak, I couldn't comprehend the depth of the words that were spoken to me. Cancer. Cancer can't be happening to my family--my husband, I thought desperately. Not now, with a baby on the way and Luke and I only five months into our beautiful storybook marriage. Not possible! I closed my weary eyes and let myself bask in the memory of the past. I wanted to remember how it felt to be young and in love. I deeply wanted to go back to the favorite day I had ever experienced and be alive in that memory and as far away from the thought of cancer as I could. Why I wrote this book-I wrote this book because I believe God allowed my family to go through trials so that we could help others. I want this book to illustrate what a powerful source God is when going through even the darkest times. I want to give hope to people facing the ugly disease of cancer. I want to be of some comfort as I relive my story and provide insight into how we got through. I want others to experience the deep indescribable peace that comes from God, even in the valley of the shadow of death. About the Author-Michelle is a passionate writer, teacher and speaker. She lives in Vancouver, WA with her husband Luke and three kids, Hayden, Hayley and Payton. She is a freelance writer and is in the process of writing more books. She loves spending time with friends and enjoying time with her family in the outdoors. Michelle loves using the trials she has endured to help others and point them to God. She loves leading teams of people and speaking into people's lives. If you would like to book her for a speaking engagement, please email her at michellebaderauthor@outlook.com

2008 Retailer's Choice Award winner! The wife of Green Bay Packers quarterback Brett Favre, Deanna was inadvertently thrust into the spotlight when she was diagnosed with breast cancer in 2004. Now cancer-free, Deanna is one of breast cancer's leading activists, speaking and raising financial support for women who are "medically underserved" (uninsured or under-insured). Deanna's story shares the role her faith has played in her life—from her years as a single mom and her high profile marriage to Brett, to her battle with breast cancer and the work she is currently doing through the HOPE Foundation. Includes 24 pages of color photos, a foreword by Brett Favre, and an afterword by Brittany and Breleigh Favre.

Dedicated to every brave warrior who has ever fought cancer. Those who survived, those who are still fighting, and those who lost the battle. There we sat at the poolside café in the gated community in Florida, where my parents have lived for the past twenty-some-odd years. I had received the heart-wrenching diagnosis less than a week earlier and had just recently broken the news to my two young children. So there we sat, just the four of us, at a table, eating our lunch, just as we had done so many times before during our annual December holiday visit. I had ordered a salad; my twelve-year-old son, Nick, was munching on a hot dog; and my husband, Jim, was eating a cheeseburger. My petite nine-year-old daughter, Whitney, was chomping away on a rack of BBQ ribs. (This is the same child who decided on the codfish when we took her to the International House of Pancakes. The second time we took her there, she went with the pot roast.) Nick had a million questions about the cancer. "How do they know it didn't spread?" "How did you get it?" "Is it contagious?" and so on. Whitney just sat there, her big eyes welling up with tears from time to time, looking at me longingly, as if she wanted

to jump in my pocket and stay in it forever. So we all sat there, trying to eat, Jim and I attempting to answer the questions as best we could to ease their worries. During the course of the meal, Jim, who always gets such a charge out of Whitney's dietary intake, made many references to the "rack" that she was consuming. "How's the rack?" "Is the rack good?" "The rack looks delicious!" "Can I try some of the rack?" Finally, I could take it no longer. I turned to my saint of a husband and said, "Under the circumstances, sweetie, do you think you could STOP saying the word rack so much?" My husband, who is ALWAYS my best audience, started laughing. Nick, who is ALWAYS asking questions, wanted to know why that was funny. Jim went on to explain to him that the word rack is sometimes used as a slang term for a set of woman's breasts. Whitney, with bone in hand and a face full of BBQ sauce, turned to us and said, "Oh, so Mommy has rack cancer?" There you have it. From that day forward, in my little corner of the world, my medical condition became known as rack cancer. It was much less frightening that way.

A unique guide, like none other on the market--packed with medical information, practical tips, psychological insight, and coping strategies--to help men help the women they love through this trying time. When Marc Silver became a breast cancer husband three years ago, he learned firsthand how frightened and helpless the breast cancer husband feels. He searched in vain for a book that would give him the information and advice he so desperately sought. Now this award-winning journalist has compiled just the kind of emotionally supportive and useful resource that he wished he had been able to consult--to give men the tools they need to help their wives, their families, and themselves through this scary, uncertain time. In his years as a consumer journalist and veteran of the News You Can Use staff at U.S. News & World Report, Marc Silver learned what kind of information and advice on medical crises readers found most valuable. He draws on that experience as he covers in depth all the issues couples coping with breast cancer will have to face during diagnosis, treatment, and beyond. Highlights include: - The shared experiences of other breast cancer husbands - Guidance from top cancer doctors in the country - Advice on when, how, and what to tell your young children - Tips on coping with radiation and chemotherapy - A candid discussion of sex and intimacy following breast cancer surgery More than 200,000 women are diagnosed with cancer each year in the United States. At last, with this book, the men who love them have a road map to help them through a difficult and unprecedented journey.

Some people suffer from chronic, debilitating disorders for which no conventional treatment brings relief. Can marijuana ease their symptoms? Would it be breaking the law to turn to marijuana as a medication? There are few sources of objective, scientifically sound advice for people in this situation. Most books about marijuana and medicine attempt to promote the views of advocates or opponents. To fill the gap between these extremes, authors Alison Mack and Janet Joy have extracted critical findings from a recent Institute of Medicine study on this important issue, interpreting them for a general audience. Marijuana As Medicine? provides patients--as well as the people who care for them--with a foundation for making decisions about their own health care. This empowering volume examines several key points, including: Whether marijuana can relieve a variety of symptoms, including pain, muscle spasticity, nausea, and appetite loss. The dangers of smoking marijuana, as well as the effects of its active chemical components on the immune system and on psychological health. The potential use of marijuana-based medications on symptoms of AIDS, cancer, multiple sclerosis, and several other specific disorders, in comparison with existing treatments. Marijuana As Medicine? introduces readers to the active compounds in marijuana. These include the principal ingredient in Marinol, a legal medication. The authors also discuss the prospects for developing other drugs derived from marijuana's active ingredients. In addition to providing an up-to-date review of the science behind the medical marijuana debate, Mack and Joy also answer common questions about the legal status of marijuana, explaining the conflict between state and federal law regarding its medical use. Intended primarily as an aid to patients and caregivers, this book objectively presents critical information so that it can be used to make responsible health care decisions. Marijuana As Medicine? will also be a valuable resource for policymakers, health care providers, patient counselors, medical faculty and students--in short, anyone who wants to learn more about this important issue.

Imagine being fifteen years old and torn from everything you know: your world, your family, and friends. Then imagine being manipulated at the very molecular level of your cells so that you are transformed into a super soldier. Now imagine spending the next two years isolated, except for more experiments conducted by hostile beings that care only about you as a test subject. You have now entered the world of Danica Jolan. At seventeen Danica is a deadly force. She is empathic, with enhanced strength and reflexes, perfect recall, and the ability to reduce her mass at will. She has been trained to handle a variety of hand weapons and pilot pursuit ships. Trust is a difficult concept, but one she must learn when she is rescued from her captors by a galactic peace keeping force called the Dramudam. Far from her homeworld and with no coordinates to it, Danica must begin her journey of self-discovery as she transitions into a young woman. Can she make the decision to give up her individuality in order to embrace her destiny as a pilot for the Dramudam and with it her name and identity as a citizen of the planet Earth?

Provides information on how cancer is diagnosed, treated, and managed day to day.

Bari's story is an absolute page-turner: if it weren't true it would be unbelievable. It's beautifully written, heartfelt and incredibly real. Her narrative style is engaging and relatable, powerfully relevant to anyone going through cancer themselves or with a loved one. Bari's story hasn't ended there: she's turned her trauma to working tirelessly as a leader in Emory Healthcare's Patient and Family Advisor Program. Sylvia Bell, survivor and caregiver for spouse; Co-chair, Emory Healthcare Patient and Family Advisory Council (PFAC)
