Teltonika Configurator software is a sophisticated tracker management tool. With just one application you can manage several types of devices. This tool lets you also make firmware updates, device diagnostics, status checks, and debug. Configurator supports connection over USB cable and Bluetooth.

'Really interesting ... a very, very good book' Steve Wright, BBC Radio 2 In Do Less, Get More, entrepreneur and bestselling author Sháá Wasmund reveals that the key to fulfilment isn't doing more, it's doing what matters. Is your life how you imagined it would be, or is the reality more stressful than you planned? Do you put yourself under too much pressure to succeed? Are you struggling to find time for the things, and people, you love? It doesn't have to be this way. Anything is possible when you stop trying to do everything at the same time. This life changing book gives you the tools to ditch your to-do list and follow your dreams. It will be your essential guide to doing what you love - and letting go of the rest.

"With Mark VanBeest and Lynn Walters"--Cover.

This book presents a coherent, novel vision of Smart Cities, built around a value-driven architecture. It describes the limitations of the contemporary notion of the Smart City and argues that the next developmental step must actively include not only the physical infrastructure, but information technology and human infrastructure as well, requiring the intensive integration of technical solutions from the Internet of Things (IoT) and social computing. The book is divided into five major parts, the first of which provides both a general introduction and a coherent vision that ties together all the components that are required to realize the vision for Smart Cities. Part II then discusses the provisioning and governance of Smart City systems and infrastructures. In turn, Part III addresses the core technologies and technological enablers for managing the social component of the Smart City platform. Both parts combine state-of-the-art research with cutting-edge industrial efforts in the respective fields. Lastly, Part IV details a road map to achieving Cyber-Human Smart Cities. Rounding out the coverage, it discusses the concrete technological advances needed to move beyond contemporary Smart Cities and toward the Smart Cities of the future. Overall, the book provides an essential overview of the latest developments in the areas of IoT and social computing research, and outlines a research roadmap for a closer integration of the two areas in the context of the Smart City. As such, it offers a valuable resource for researchers and graduate students alike.

More Food: Road to Survival is a comprehensive analysis of agricultural improvements which can be achieved through scientific methods. This reference book gives information about strategies for increasing plant productivity, comparisons of agricultural models, the role of epigenetic events on crop production, yield enhancing physiological events (photosynthesis, germination, seedling emergence, seed properties, etc.), tools enabling efficient exploration of genetic variability, domestication of new

species, the detection or induction of drought resistance and apomixes and plant breeding enhancement (through molecularly assisted breeding, genetic engineering, genome editing and next generation sequencing). The book concludes with a case study for the improvement of small grain cereals. Readers will gain an understanding of the biotechnological tools and concepts central to sustainable agriculture. *More Food: Road to Survival* is, therefore, an ideal reference for agriculture students and researchers as well as professionals involved sustainability studies.

Bryan Webster started out his 10,000+ hour flying career by taking a ride in a two-seat single engine Cessna 150 and ending up inverted in the silty Fraser River beneath a large unmarked power line span east of Vancouver, BC, Canada. This experience left a lasting impression which 25 years later was the foundation for a new training concept for pilots of light aircraft, Aviation Egress Systems. (More at www.dunkyou.com). During Bryan's many years as a pilot he witnessed other aviators in the industry and recreational flyers with no predetermined escape strategy succumb needlessly to drowning while unable to egress from an inverted aircraft forced to ditch in water. Understanding personally the perils of egressing from a ditched aircraft he designed and built equipment to be used in aquatic centers simulating the challenges of disorientation and panic. After witnessing thousands of students in a controlled situation, many of which who had great difficulty coping with the inverted underwater experience he felt compelled to document behavioural strategies in a book form to reach the flying public and educate them on the importance of this not well documented subject. This book's content teaches pilots and passengers what to think about and how to react to successfully escape from a downed aircraft and then survive the after effects regarding life vests, life rafts and hypothermia. Designed to be educational on the technical aspects of ditching an aircraft mixed with real life experience and a bit of humour for an informative, useful guide to help pilots and passengers understand and respect the hazards of light aircraft ditchings world wide.

Gill's tarot pack is based on the structure of "The Tree of Life". Much of the imagery in "The Gill Tarot Deck" draws from passages in classical religious literature. "The Gill Tarot" by Elizabeth Josephine Gill presents 78 stunning full-color pictures which enable the reader to see his or her own reflection of life.

Is is the 9th Edition of the Substitute Teacher Handbook by STEDI.org

West is a high school senior who has everything going for him - until an accident leaves him paralysed. Strapped down in his hospital bed, moving in and out of consciousness, West is isolated and alone. Until he meets Olivia. Olivia is the girl next door - though not the typical girl next door. She is in the hospital room next to his, and before long, she's sneaking into his room to talk with him. Only Olivia seems to know what he's thinking, and even dreaming about. Yet certain questions haunt him- Why is Olivia in the hospital? And how is she connected to the terrible dreams he's been having? But the biggest shock of all comes when West must face the possibility that the girl he's fallen in love with - and who's done more to aid his recovery than anyone else - may not even be alive.

Deep within Crik Wood is a village in which every person has a unique ability called a "Talent." The Mayor can talk to insects, a girl can disappear in a cloud of smoke, and a young boy called Jack has a living shadow. One thunderous night Jack discovers the horrifying secret buried at the heart of his village. Thrown into an adventure filled with danger and discovery, Jack is faced with the question: 'What would you do if your closest friend was your greatest enemy?' For Jack that someone is his shadow.
