Answer: The value of is 36. Step-by-step explanation: Given expression: To find the value of at  $b=5$ , we need to substitute the  $b=5$  in the expression, we get. Therefore, the value of is 36, when  $b=5$ .

Brainly.com - For students. By students.

The slope of the line is the quotient of the length of the vertical side and the length of the horizontal side of the slope triangle. This number is the same for all slope triangles for the same line because all slope triangles for the same line are similar. In this example, the slope of the line is  $\frac{2}{3}$

Grade 8 Mathematics, Unit 2.10 - Open Up Resources

The students communicate with each other and must agree upon the answer to the problem. Because the students must agree upon the answer, this will take discussion, critiquing, and justifying of answers by both students (MP3). From the Video on Triangles, you can hear the students discuss the problem and agree upon the answer to the problem. As the pairs discuss the problem, they must be precise in their communication within their groups using the appropriate math terminology for this skill.
