The genesis of the sub prime fiasco that resulted in this catastrophic financial melt down began with flawed credit reports. These were the bed rock upon which this house of cards was constructed. But the big question is how could these villains have escaped censure during the media blitz of the past year that blamed anyone remotely responsible? This gold standard of the FICO scores fails even base metal quality. How can these most malignant contributors be over looked and forgotten? Just how have they seemingly totally escaped criticism? Proof of inflation FICO scores is the elephant outside that is evidenced by the millions and millions of existing bad loans complete with documentation. Proof of misdeeds are legend. No conversation will be sufficient to offset these lies accepted as gospel. FICO is a four letter word explains it all.

This book treats the slavery problem in the Roman provinces in the Balkan-Danubian area (Dalmatia, Pannonia, Dacia, Moesia) which corresponds with territories of former communist countries (Hungary, former Yugoslavia, Romania and Bulgaria). This problem was partially treated before 1989, but from the perspective of class struggle between the slaves and their masters. The work is structured in two main parts: one deals with imperial freedmen and slaves, the other with private freedmen. The difference between these two categories is essential: the imperial freedmen and slaves are officially employed in important bureaus of the emperors' offices and their material and social status is often very high, while the private freedmen who could overcome their juridical status through wealth and municipal honours were only a few. In comparison with other western provinces of the Roman Empire, the social status of freedmen in the Illyrian provinces is not essentially different. The specific features of this social category in the studied area is given by the functions occupied by the imperial freedmen and slaves in administrations (especially in mining administration, which was a particularity for provinces like Dacia, Dalmatia or Moesia Superior). (Text in French language)

G Protein Signaling Pathways in Health and Disease, Volume 161 in the Progress in Molecular Biology and Translational Science series, provides informative and exciting monographs on a wide variety of research topics related to G Protein Signaling Pathways in Health and Disease. The series gives in-depth knowledge on the important molecular biological aspects of organismal physiology and function, along with insights on how this knowledge can be applied to understand and ameliorate human disease. This updated release covers Diseases associated with mutations in CNGA3, Mutations in arrestins, Diseases caused by mutations in GPR101, Diseases caused by mutations in lutropin receptor, and much more. Comprises 15-20 chapters, providing substantial coverage on a given topic Contains ample use of tables, diagrams, schemata and color figures to enhance the reader's ability to rapidly grasp the information provided in each chapter Provides a comprehensive guide to the latest information available on prions, viruses, bacteria, and eukaryotes
